Re: RRG/Clayton Chemical Site

Dear Mr. Turner:

We represent Nordenia, Inc. in connection with the Clayton Chemical Site ("Site"). Nordenia received the November 22, 2004 General Notice Letter ("General Notice"), which requested that Nordenia and 72 other entities reimburse EPA for EPA's costs and voluntarily perform or finance a response action consisting primarily of a soils removal action at the Site. In 2002, Nordenia received a separate General Notice Letter, which requested that Nordenia and others perform a removal action at the Site. As a result of that Notice, Nordenia signed an Administrative Order on Consent with EPA and several other PRPs. Nordenia also signed a PRP Agreement with the PRP group, and made a substantial payment to help finance the liquids removal action that was successfully completed by the participating PRPs. Nordenia has cooperated fully with all requests of EPA in connection with the Site.

The General Notice indicates that EPA sent General Notice letters to the PRPs who sent 75,000 gallons or more to the Site. The General Notice states that this group consists of only 73 of the approximately 2,800 PRPs that sent material to the Site. Nordenia questioned why it was included, as its own records indicate that it sent only 67,551 gallons of material to the Site. The General Notice indicates that in determining which entities would receive the General Notice, EPA relied upon information furnished to EPA by the performing PRPs for the liquids removal. The General Notice states that EPA relied specifically on the report titled, "The RRG/Clayton Liquids Removal Investigation Report," and states that "the Agency is notifying all PRPs that sent or contributed 75,000 gallons or more to the Site that they are PRPs." The report included a volumetric ranking of PRPs that sent material to the Site.

Since receiving the General Notice for the soils removal, Nordenia has reviewed The RRG/Clayton Liquids Removal Investigation Report ("Report"). At the time the Clayton Chemical Site operated, Nordenia was known as M & W Packaging. The Report summarily states that M & W Packaging sent 85,504 gallons of material to the Site, although there is no indication of what specific documents support this figure. Due to the discrepancy between Nordenia's own numbers and those in the Report, Nordenia also obtained from the PRP group a disk containing all of the underlying annual reports and other documents that the PRP group utilized in compiling the volumetric ranking. Given the significance that EPA placed upon the information in the Report, we literally reviewed every page of every report on that disk, which consists of several thousand pages. We had to resort to this because the disk does not identify the specific documents that the PRP group utilized to come up with the 85,504 gallons. I enclose for your consideration, a copy of the excerpt of every annual report from the disk that references M & W Packaging.

Using the information on the disk, the total volume that we found that is attributable M & W Packaging is only 52,143 gallons. This breaks down to 18,656 gallons of hazardous waste in 1994, 27,007 gallons of hazardous waste in 1995, 6,205 gallons of hazardous waste in 1996, 110 gallons of special waste in 1994 and 165 gallons of special waste in 1995. We are at a loss to understand why the PRP group Report states that M & W Packaging, Inc. sent 85,504 gallons to the Site. At one of the EPA informational meetings at least one PRP who participated in the liquids removal indicated that there was the potential for mathematical error in the Report, and we believe that a mathematical error was made in the case of M & W Packaging.

We have also reviewed Nordenia's own records in the form of manifests that it retained in its own files of all shipments to Clayton Chemical, and Nordenia's records indicate that M & W Packaging sent 67,551 gallons of material (this includes both hazardous and non-hazardous) to Clayton Chemical between 1994 and 1997. Nordenia believes that it has reliable and complete records of the shipments that it sent to the Clayton Chemical Site. I have enclosed copies of our manifests for your reference.

Regardless of whose records are considered, Nordenia's or the PRP Group's, neither set indicates that Nordenia sent in excess of 75,000 gallons of material to the Site. Therefore, using EPA's own criteria of 75,000 gallons, Nordenia should not have received the General Notice Letter. When you also consider the fact that Nordenia has already paid \$46,200 toward resolving its alleged liability, and you also consider that approximately 2,700 PRPs have never received any notice of potential liability for the Clayton Chemical Site nor contributed to any cleanup, Nordenia feels that it has paid more than its fair share to resolve its alleged liability to EPA.

Nordenia respectfully requests that EPA remove it from the PRP list. Notwithstanding this request, Nordenia will continue to cooperate with EPA toward resolving its potential liability for this Site. We would greatly appreciate a prompt response to this request because, as you

Mr. Tom Turner
April 7, 2005

ARMSTRONG TEASDALE LLP

know, in the near future EPA expects to enter into an order with a group of PRPs to perform the soils removal. Please direct your response to me.

Sincerely yours,

A handwritten signature in black ink, appearing to read 'Julie O'Keefe', with a stylized, cursive script.
